

## **DOE Lessons Learned Template-**

Title: **Disposition of equipment, after its useful life, for a closure site**

Date: 06/16/05

Identifier: 2005-RF-29

Lessons Learned Statement:

Discussion of Activities Analysis: Estimated Savings/Cost Avoidance (if applicable):

The Rocky Flats Project Office personnel noted that there was no formal process or a method to determine priority and right of first refusal for disposition of excess radiation monitoring equipment.

Recommended Actions: There should be a formal system or process established for prioritizing disposition of equipment to other DOE facilities because many sites will be closing in future years and there is a definite need to disposition off excess property and equipment.
